PERRY JOHNSON LABORATORY ACCREDITATION, INC.

Certificate of Accreditation

Perry Johnson Laboratory Accreditation, Inc. has assessed the Laboratory of:

Juan Daniel Padilla de la Sancha / JD Calibraciones

Agustín Millán #130, Col. Granjas Valle de Guadalupe Ecatepec, Estado de México, México. C.P. 55270

(Hereinafter called the Organization) and hereby declares that Organization is accredited in accordance with the recognized International Standard:

ISO/IEC 17025:2017

This accreditation demonstrates technical competence for a defined scope and the operation of a laboratory quality management system (as outlined by the joint ISO-ILAC-IAF Communiqué dated April 2017):

Thermodynamic, Electrical, Mechanical, Acoustic and Chemical Calibration (As detailed in the supplement)

Accreditation claims for such testing and/or calibration services shall only be made from addresses referenced within this certificate. This Accreditation is granted subject to the system rules governing the Accreditation referred to above, and the Organization hereby covenants with the Accreditation body's duty to observe and comply with the said rules.

For PJLA:

Confession

Accreditation is granted to the facility to perform the following calibrations:

MEASURED DISTRUMENT, QUANTITY OR GADGE	DEVICE SIZE AS APPROPRIATE	CALIBRATION AND MEASUREMENT CAPABILITY EXPRESSED AS AN UNCERTAINTY OF	CALIBRATION EQCIPMENT AND REFERENCE. STANDARDS USED	
Vacuum Gauges ^{PO}	-15 inHg to 0 inHg	0.8 inHg@20°C	Digital Gauge	
Pressure Gauge ⁸⁰	15 psi to 3 000 psi	1.1 psi	Additel 681 DCT Instruments JAW15V CENAM Technical Guide	

MEASURED INSTRUMENT, QUANTITY OR GAUGE	RANGE OR NOMINAL DEVICE SIZE AS APPROPRIATE	CALIBRATION AND MEASUREMENT CAPABILITY EXPRESSED AS AN UNCERTAINTY (4)	CALIBRATION EQUIPMENT AND REFERENCE STANDARDS USED
Sound Level Meter Fixed Points ^p	94 dB to 114 dB	0.9 dB	Acoustical Calibrator REED R8090

MEASURED INSTRUMENT, QUANTITY OR GAUGE	RANGE OR NOMINAL DEVICE SIZE AS APPROPRIATE	CALIBRATION AND MEASUREMENT CAPABILITY EXPRESSED AS ANUNCERTAINTY (4)	CALIBRATION EQUIPMENT AND REFERENCE STANDARDS USED
Conductivity Meter Fixed Points ⁸	84 µS/cm to 1 413 µS/cm	1.5 µS/cm	Hanna Conductivity Solutions CENAM Technical Guide
pH Meter Fixed Points ^p	4 pH	0.02 pH	Milwaakee pH Solations CENAM Technical Guide
	7 pH	0.02 pH	
	10 pH	0.02 pH	

- 1. The CMC (Calibration and Measurement Capability) stated for calibrations included on this scope of accreditation represents the smallest measurement uncertainty attainable by the laboratory when performing a more or less routine calibration of a nearly ideal device under nearly ideal conditions. It is typically expressed at a confidence level of 95 % using a coverage factor k (assuit) equal to 21. The actual measurement uncertainty associated with a specific calibration performed by the laboratory will typically be larger than the CAIC for the same calibrations aim on epithelian and performance of the device being calibrated and the conditions related to the calibration may reasonably be expected to deviate from ideal to some describe.
- The laboratories range of calibration capability for all disciplines for which they are accredited is the innerval from the smallest cultivated standard to the largest cultivated standard and each green from the formation. The low end of this range must be an antinable value for which the laboratory has or has access to an antinable value for which the laboratory has or has screen to an antinable value for value for the laboratory has or has accessed and the smallest referenced. Verification of an indicated value of zero in the absence of a smallest is common practice in the proceedars for many cultivations but by in definition of indoes not constitute exilication of the contribution of the contri

Certificate of Accreditation: Supplement

Juan Daniel Padilla de la Sancha/JD Calibraciones Agustín Millan #139, Col. Granjas Valle de Guadalispe Ecatepec, Estado de México, México. C.P. 55270 Contact Name. Juan Daniel Padilla de la Suncha. Phone: 556-350-2487

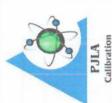

Accreditation is granted to the facility to perform the following calibrations:

- The presence of a superscript F means that the laboratory performs callibration of the indicated parameter at its fixed location. Example. Outside Micrometer? would mean that the laboratory performs this calibration at its fixed location.
- The presence of a superscript PO means that the laboratory performs calibration of the indicated parameter both at its fixed location and onsite at castomer locations. Example: Outside Micrometer of would mean that the laboratory performs this calibration at its fixed location and easile at castomer locations.
- Measurement uncertainties obtained for calibrations performed at customer sites can be expected to be larger than the measurement uncertainties obtained at the laboratories fixed location for similar calibrations. This is due to the effects of transportation of the standards and equipment and upon environmental conditions at the customer site which are typically not controlled as closely as at the laboratories fixed location.

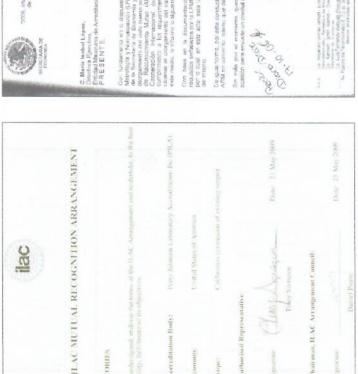

Acreditación ISO/IEC 17025

No. acreditación 93752

El certificado de calibración que tienes en tus manos, emitido por JD Calibraciones, es válido en el territorio acuerdo internacional ILAC-MRA. Este acuerdo da a nuestras calibraciones la misma validez que los laboratorios acreditados por otros cuerpos por ejemplo ema(México), UKAS (Inglaterra), a2La (EU),etc. A continuación se Nacional. Está respaldado por una acreditación otorgada por PERRY JONHSON LABORATORY ACREDITATION INC. (PJLA), uno de los cuerpos de acreditación mas prestigiados a nivel nacional e internacional, así como por el muestra la documentación que respalda lo indicado:

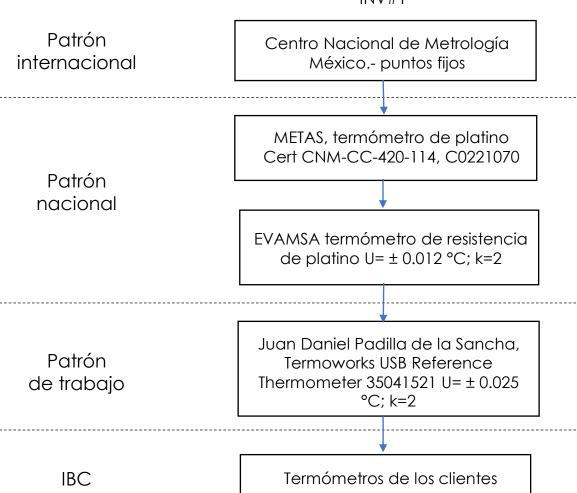

DGN:312.01.2005.6081 Estado de México, a 16 de octubre del 2006 Migration of the control of the cont

Estos documentos fundamentan la validez de nuestras calibraciones y certificados por lo cual no dude en presentarlos ante cualquier, inspección, auditoría, autoridad, etc.
